Lockhart Consulting

The GoTo Partner for SAP needs

Data warehousing

Lockhart Consulting Group utilizes Data Warehousing (DW) to collect and manage data from varied sources to provide meaningful business insights. A Lockhart Consulting uses Data warehouses to connect and analyze business data from heterogeneous sources. DW is a blend of technologies and components which aids the strategic use of data. It is electronic storage of a large amount of information by a business which is designed for query and analysis instead of transaction processing. It is a process of transforming data into information and making it available to users in a timely manner to make a difference.
